

Lakes and Craters Precinct: Lake Bookaar

Lake Bookaar is located in a State wildlife reserve and has been listed as a wetland of international significance under the Convention on Wetlands (Ramsar, Iran 1971)

Lake Keilambete

Lake Keilambete is a near perfectly very saline circular lake of national significance. Access via Fenton's Quarry on Racecourse Road Terang (permission to be given). Rich source of fossils are valuable for research. Water is reputed to have therapeutic value.

Lake Keilambete is included in the Alan Marshall Precinct. In his autobiographical best seller 'I Can Jump Puddles' he describes how he taught himself to swim in Lake Keilambete. The interpretation board is located on Keilambete Road on the North West point of the lake.

Lake Terang

Lake Terang is a dry crater lake of State significance. Access off Princes Highway in the center of Terang. Walking track all the way around the lake. Golf, bowls and croquet nearby. Also caravan park, toilets and barbeque facilities nearby.

Lake Bookaar: How to get there?

From Camperdown, drive along the Princes Highway (towards Terang) and turn right down Darlington Road and Lake Bookaar is on the right.

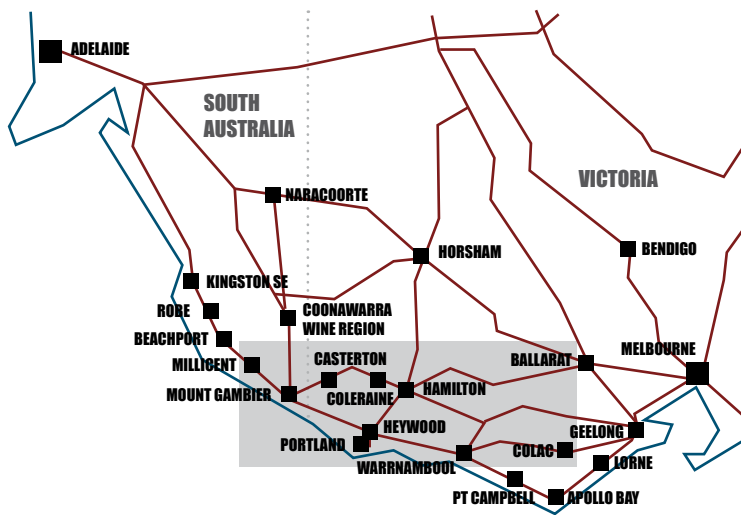

Things to do:

The lake features a wide range of native plants and birdlife and offers sailing and other boating, spectacular photography, picnicking, walking, duck hunting in season, camping, and has a recreation reserve and interpretive centre on its southwest side.

Lake Keilambete: How to get there?

Lake Keilambete is located on Racecourse Road, Terang. Access is only available with prior permission.

Australia may be referred to as a relatively young nation, but the well-preserved ancient landscape provides many precious windows into the past. The Kanawinka Global Geopark can take you on an amazing journey through this landscape, enabling visitors to travel back in time over thousands and thousands of years.

The surface geology of South Western Victoria and South Eastern South Australia is a striking contrast of sweeping plains and spectacular mountains which are largely the product of volcanic activity. In fact, with six sites of international significance and 14 of national significance, this area is Australia's most extensive volcanic province.

The history of these geological masterpieces stretches back to the Tertiary and Quaternary eras, when great outpourings of volcanic material through vents took place. Lava flows spread evenly across the existing plains, followed valleys, flowed under water, and in some cases forced upwards into rough, stony hills called tumuli, or steeper scoria cones.

In total, the flows cover an area of some 23,000 square km, extending north to the hills beyond Ballarat, and reappearing in a small section of south-eastern South Australia. This area is known as the Newer Volcanics Province, and features nearly 400 individual eruption points, most of which occurred between 4.5 and 2 million years ago.

Many of the eruptions were witnessed by the indigenous peoples of the area who have inhabited this region for up to 45,000 years, and feature prominently in stories of the Dreamtime.

Aboriginal people also made use of the stones from the lava flow to construct channels linking the wetlands, weirs, fish-traps, wind breaks and stone huts, and excellent examples created by the Gunditjmarra people can be found around Western Victoria's Lake Condah region in particular.

Later, during the 1870s and 80s, European settlers utilised the volcanic stone cleared from the land to construct dry stone walls in order to grow crops and introduce stock. Many examples can be found surrounding Corangamite on the Dry Stone Walls Heritage Trail.

The region's spectacular and intriguing volcanic landscape also offers a range of other visitor experiences, from a 45-minute tour to the surface of Mount Gambier's Blue Lake, to the gruelling trek up Mount Schank and down to the crater floor.

In western Victoria, you can go on a chartered boat tour to Lady Julia Percy Island, which has the largest colony of Australian fur seals in the southern hemisphere. Or, take The Alan Marshall Walking Tour of Mount Noorat and the nearby township, or swim in the turquoise-coloured waters of Lake Surprise.

There are also plenty of picturesque picnic and camping spots just waiting to be discovered. Alternatively, you can take your time and spend the night in one of the numerous towns in the Kanawinka Global Geopark.

The Geopark is known as KANAWINKA GEOPARK, meaning Land of Tomorrow from the Buandik people. It is also the name of a geological fault line from Naracoorte Caves to Bass Strait at Portland and a Parish name west of Casterton about 1911 so all levels of the history, Geological, Indigenous and European are brought together in one name.

The Kanawinka Geopark was declared the 57th Member of the Global Network of National Geoparks assisted by UNESCO on June 22, 2008.
